NA AULA ANTERIOR...

Wireframe, Mockup,
Protótipo... é tudo a
mesma coisa?

~~Prat~~

NA AULA ANTERIOR...

É uma manifestação de design que permite aos stakeholders interagirem com ele e explorarem sua adequação

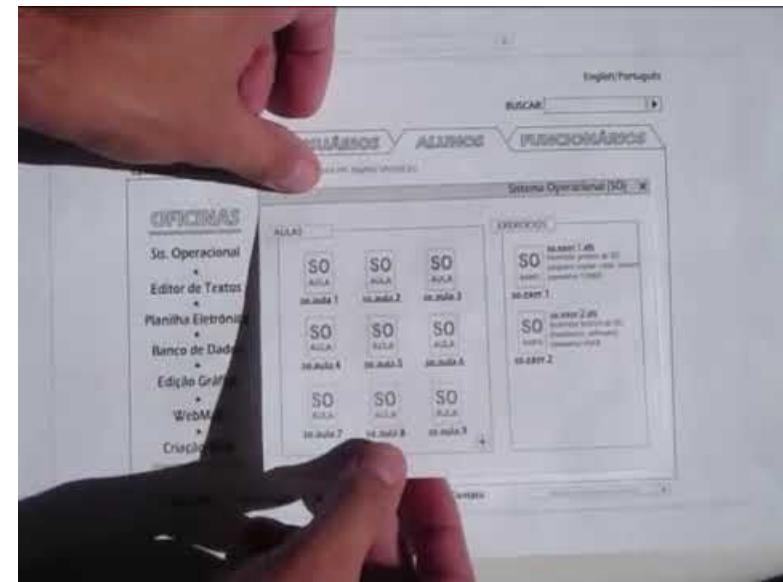

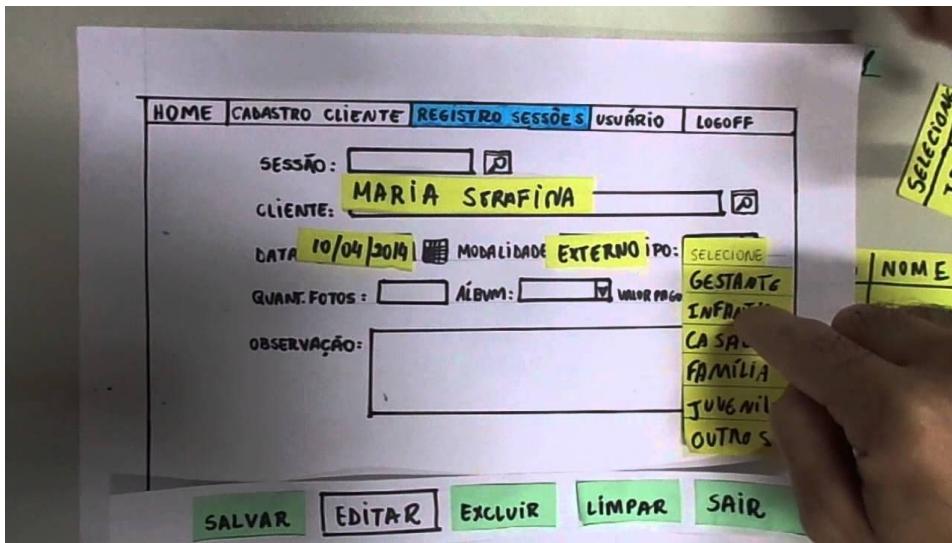

- Baixa fidelidade
- Média fidelidade
- Alta fidelidade

Protótipo
NA AULA ANTERIOR...

Baixa fidelidade

É aquele que não se parece muito com o produto final, mas permite análise da interação.

Técnica de exemplo: Prototipação em papel

~~Protótipos~~ NA AULA ANTERIOR... ~~aprendizagem~~

Consiste em esboçar telas e objetos de interação (de acordo com o projeto de interação proposto) em papéis no tamanho real esperado para cada um

A construção de protótipos em papel é uma técnica clássica de grande aceitação no meio dos especialistas em projetos de interfaces de usuário devido à sua simplicidade, ao seu baixo custo e por ser muito efetiva.

~~Mockups~~
NA AULA ANTERIOR...

**Os mockups são a evolução dos wireframes
enriquecido de detalhes de design visual da
interface (ainda estáticos)**

- representa a estrutura da informação, visualiza o conteúdo e demonstra as principais funcionalidades de uma forma estática
- estimula as pessoas a realmente revisarem a parte visual do projeto

Comparação

De maneira geral...

REPRESENTAÇÃO	FIDELIDADE	CUSTO	USO	CARACTERÍSTICAS
Wireframe	baixa	\$	Documentação, comunicação rápida	Rascunho, representação preta e branca da interface
Protótipo	média a alta	\$\$\$	Teste de usabilidade, esqueleto reutilizável para o desenvolvimento da interface	Interativo
Mockup	média a alta	\$\$	Coletar feedback e conseguir vender a ideia do produto	Visualização estática

Protótipos de baixa fidelidade também são criados, principalmente nas técnicas participativas (que envolvem o usuário) e podem tornar-se interativos com abordagens similares à prototipagem em papel.

Grid

From Wikipedia, the free encyclopedia

A typographic grid composed of a series of intersecting vertical and horizontal axis.

The grid in use, typography is arranged flush left, ragged right on the grid.

A typographic grid is a two-dimensional structure made up of a series of intersecting vertical and horizontal axis used to structure content. The grid serves as an armature on which a designer can organize text and images in a rational, easy to absorb manner. The less common printing term "reference grid," is an unrelated system with roots in the early days of printing.

modernist ideas of Jan Tschichold's *Die neue Typographie* (The New Typography), began to question the relevance of the conventional page layout of the time. They began to devise a flexible system able to help designers achieve coherency in organizing the page. The result was the modern typographic grid that became associated with the International Typographic Style. The seminal work on the subject, *Grid systems in graphic design* by Müller-Brockmann, helped propagate the use of the grid, first in Europe, and later in North America.

Today, more as a useful tool for some projects, not as a requirement or starting point for all page design.

History

Antecedents

Before the invention of movable type and printing, simple grids based on optimal proportions had been used to arrange handwritten text on pages. One such system, known as the "Villard's diagram," was in use at least since medieval times.

Evolution of the modern grid

After World War II, a number of graphic designers, including Max Bill, Eric Rüder, and Hans Brandenburg, influenced by the

grid by typographers setting themselves resulted in a wave of experimentation, much of it contrary to the precepts of Tschichold and Müller-Brockmann. The typographic grid continues to be taught to be taught for some projects, not as a requirement or starting point for all page design.

At the top, there's a Twitter logo and a download section for various tools like Acorn, Fireworks, Flash, InDesign, GIMP, Inkscape, Illustrator, OmniGraffle, Photoshop, QuarkXPress, Visio, and Exp Design. A prominent feature is a large "960 GRID SYSTEM" logo. Below it, a button says "Big ol' DOWNLOAD button :)" with arrows pointing left and right. There are also links for "changelog", "VIEW SLIDES ABOUT THE 960 GRID SYSTEM", "ADAPT.JS - ADAPTIVE CSS", "CUSTOM CSS GENERATOR", and "GRID OVERLAY BOOKMARK". The page is divided into sections: "Essence", "Dimensions", "Purpose", "More Columns", and "Source Order", each with descriptive text and links.

ADAPT.JS - ADAPTIVE CSS CUSTOM CSS GENERATOR GRID OVERLAY BOOKMARK

Essence

The 960 Grid System is an effort to streamline web development workflow by providing commonly used dimensions, based on a width of 960 pixels. There are two variants: 12 and 16 columns, which can be used separately or in tandem. [Read more](#).

Dimensions

The 12-column grid is divided into portions that are 60 pixels wide. The 16-column grid consists of 40 pixel increments. Each column has 10 pixels of margin on the left and right, which create 20 pixel wide gutters between columns. [View demo](#).

Purpose

The premise of the system is ideally suited to rapid prototyping, but it would work equally well when integrated into a production environment. There are printable sketch sheets, design layouts, and a CSS file that have identical measurements.

More Columns

For those more comfortable designing on a 24-column grid, an alternative version is also included. It consists of columns 30 pixels wide, with 10 pixel gutters, and a 5 pixel buffer on each side of the container. This keeps text from touching browser chrome — helpful for devices like the iPhone, where a lowercase "l" or "L" might be easily missed. [View demo](#).

Source Order

By utilizing the *push_XX* and *pull_XX* classes, elements can be rearranged, independent of the order in which they appear in the markup. This allows you to keep more pertinent info higher in the HTML, without sacrificing precision in your page layout. For instance, view the source code of this page to see how the *H1* tag has been re-positioned.

Below the toolbar, the main area has tabs for 'Video' (selected), 'Preview', and 'Share'. On the right, there are buttons for 'Themes', 'Music', and 'Layout'. The main workspace displays a video frame with a speech bubble containing icons for 'Icon', 'Photo', and 'Text'. A text overlay asks, 'What problem does the audience — or who you're helping — struggle with today?'. Below the video frame, there's a timeline with a play button, a plus sign, and numbered steps from 1 to 5: 'Setting', 'Problem', '...', 'What could be', 'Solution or idea', and 'F...'. To the right of the workspace, there are three preview cards: 'Snap' (dark gray background), 'Spotlight' (light blue background), and 'Swing' (red background). The bottom of the screen features a navigation bar with a play button, a plus sign, and a red footer bar.

Lorem Ipsum

"Neque porro quisquam est qui dolorem ipsum quia dolor sit amet, consectetur, adipisci velit..."
"Não há ninguém que ame a dor por si só, que a busque e queira tê-la, simplesmente por ser dor..."

O que é Lorem Ipsum?

Lorem Ipsum é simplesmente uma simulação de texto da indústria tipográfica e de impressos, e vem sendo utilizado desde o século XVI, quando um impressor desconhecido pegou uma bandeja de tipos e os embaralhou para fazer um livro de modelos de tipos. Lorem Ipsum sobreviveu não só a cinco séculos, como também ao salto para a editoração eletrônica, permanecendo essencialmente inalterado. Se popularizou na década de 60, quando a Letraset lançou decalques contendo passagens de Lorem Ipsum, e mais recentemente quando passou a ser integrado a softwares de editoração eletrônica como Aldus PageMaker.

G Suite

TESTE GRÁTIS

De onde ele vem?

Ao contrário do que se acredita, Lorem Ipsum não é simplesmente um texto randômico. Com mais de 2000 anos, suas raízes podem ser encontradas em uma obra de literatura latina clássica datada de 45 AC. Richard McClintock, um professor de latim do Hampden-Sydney College na Virgínia, pesquisou uma das mais obscuras palavras em latim, consectetur, oriunda de uma passagem de Lorem Ipsum, e, procurando por entre citações da palavra na literatura clássica, descobriu a sua indubitável origem. Lorem Ipsum vem das seções 1.10.32 e 1.10.33 do "de Finibus Bonorum

Porque nós o usamos?

É um fato conhecido de todos que um leitor se distrairá com o conteúdo de texto legível de uma página quando estiver examinando sua diagramação. A vantagem de usar Lorem Ipsum é que ele tem uma distribuição normal de letras, ao contrário de "Conteúdo aqui, conteúdo aqui", fazendo com que ele tenha uma aparência similar a de um texto legível. Muitos softwares de publicação e editores de páginas na Internet agora usam Lorem Ipsum como texto-modelo padrão, e uma rápida busca por 'lorem ipsum' mostra vários websites ainda em sua fase de construção. Várias versões novas surgiram ao longo dos anos, eventualmente por acidente, e às vezes de propósito (injetando humor, e coisas do gênero).

Onde posso conseguir-lo?

Existem muitas variações disponíveis de passagens de Lorem Ipsum, mas a maioria sofreu algum tipo de alteração, seja por inserção de passagens com humor, ou palavras aleatórias que não parecem nem um pouco convincentes. Se você pretende usar uma passagem de Lorem Ipsum, precisa ter certeza de que não há algo embaralhado escondido no meio do texto. Todos os geradores de Lorem Ipsum na internet tendem a repetir pedaços predefinidos conforme necessário, fazendo deste o primeiro gerador de Lorem Ipsum autêntico da Internet. Ele usa um

ATIVIDADE

- Baseado na atividade de brainstorming realizada há algumas aulas, os grupos agora deverão criar o mockup da página principal
